**A simplified  
Guide to Falco's  
Presbyopia Systems**

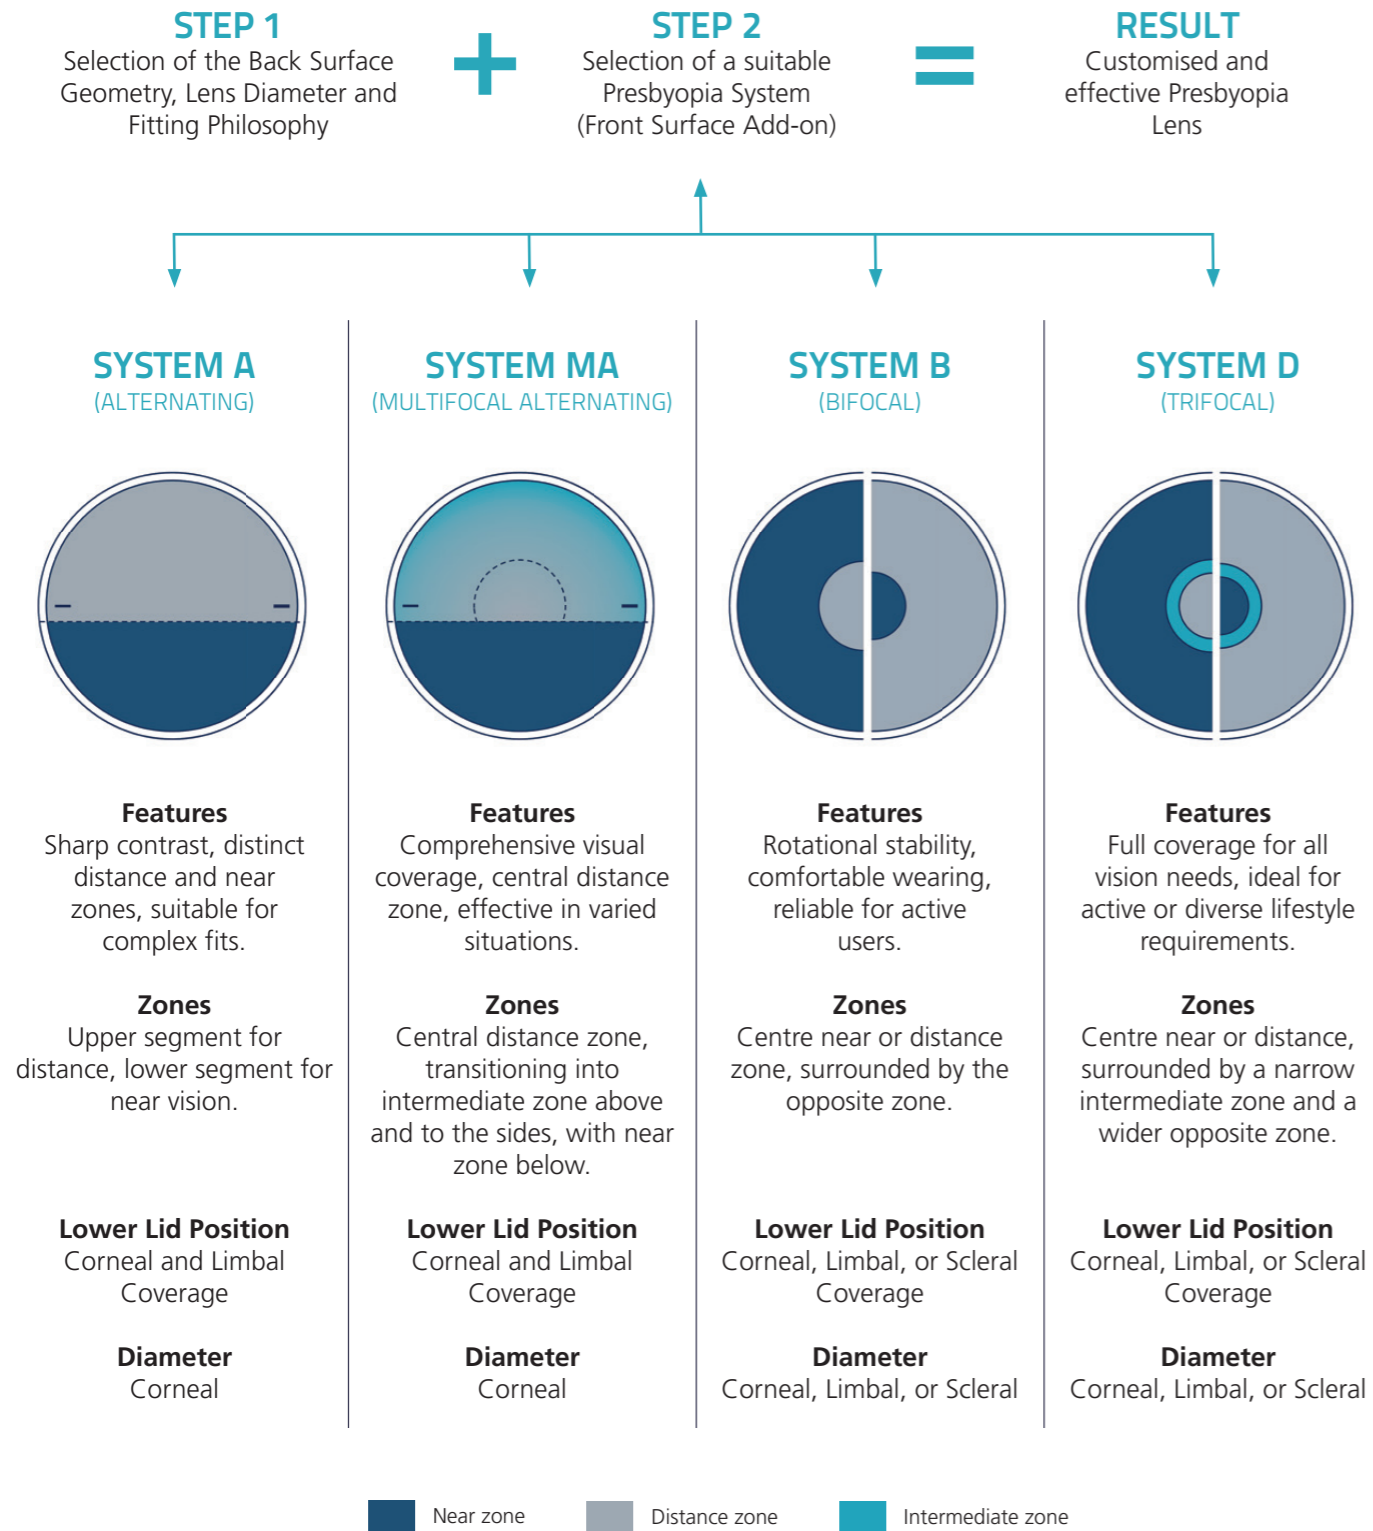

PREBYOPIA  
SYSTEMS

falco®

# OUR MODULAR PRESBYOPIA SYSTEMS: TAILORED SOLUTIONS FOR EVERY NEED

Falco's presbyopia systems provide modular optical solutions that can be combined with a variety of lens designs. This ensures every patient's unique needs are met – precisely and effectively.

All presbyopia systems are modular and can be integrated with any lens design, including toric lenses for astigmatic corrections with cylinders in all axis positions.

# THE PERFECT SYSTEM FOR EVERY NEED & LIFESTYLE

Falco presbyopia systems can be used for a wide range of applications. Just like the requirements of our patients.

LISA, 55

Lisa, who often drives at night, benefits from the **A system's** high contrast, which ensures she has clear, sharp vision even in the low-light conditions at dusk.

Falco System  
A

**Best for**  
Low light & high contrast situations

EMMA, 44

Emma, a frequent screen user, experiences significant relief from eye strain during long computer sessions with the **MA system's** intermediate zone, while still enjoying crystal-clear vision of the documents on her desk.

Falco System  
MA

**Best for**  
Digital & screen work

ALEX, 49

Alex, an outdoor enthusiast, appreciates the **B system** for its stability across all gaze directions, making it the perfect companion for his active sports lifestyle.

Falco System  
B

**Best for**  
Outdoor & sport activities

DAVID, 56

David, active both in sports and business, enjoys the versatility of the **D system**, allowing him to see clearly at all distances with ease. Whether he's in meetings or engaging in outdoor activities, the D lens provides the comfort and allrounder qualities he values in his mid-50s.

Falco System  
D

**Best for**  
Allround (activities & work)

# FALCO'S QUICK GUIDE FOR PATIENT PROFILE / NEEDS

Patient Profile / Needs	Recommended System	Benefits for the Patient
High demands for near and distance vision	A	Clear contrast and well-defined near/ distance zones for all distances, ideal for work requirements
Active lifestyle and frequent changes in gaze direction	B	Stable vision regardless of gaze direction, ideal for outdoor activities and sports
High visual demands in low light conditions	A	Excellent contrast, even at dusk or in darkness
Office work and screen usage	D / MA	Relieves eye strain during extended screen time through a specially adapted intermediate zone, making it easier to switch between screen, documents, and surroundings
Sensitive, delicate or dry eyes	B / D	Comfortable fit for long wearing times; larger lens diameters recommended
High hyperopia	B / D	Stable fit and well-defined zones, even with high correction
High reading load and focused on near vision	A	Optimised near zone for comfortable reading without glasses
All-round system for varying demands	B / D	Covers all visual ranges and offers flexibility in daily life without needing to change lenses
Higher near addition (Add > 1.75 D)	MA / D	Covers all visual ranges and provides flexibility for daily use
